

# Hawkeye Pro Slim and Pro Hardy

High Specification Rigid Borescopes

The Hawkeye Pro range of boscopes is designed for the professional user. The high contrast images produced are bright, clear and detailed. The Pro instruments incorporate an enhanced light post and SuperNova light source with rechargeable lithium-ion batteries as standard. These boscopes are economical, highly portable and incorporate an independent focusing ring making them particularly suitable for still and video image capture.

Each Hawkeye Pro Kit contains:

- Precision borescope
- Mirror tube
- SuperNOVA light system with charger
- Rugged aluminium carrying case
- Cleaning kit

## Pro Slim

The clarity and brightness of the Pro Slim system highlights all the workpiece detail. Most machined metal parts have ample access for the Pro Slim borescope and mirror tube enabling burrs and surface finish in bores and cross-holes to be clearly seen.

Specification			Standard Probe		With Mirror Tube		
	Model	Probe length mm (Inch)	Outside Diameter (mm)	Field of View	Direction of view	Outside Diameter (mm)	Direction of view
	PS07-NVK	180 (7.0)	4.20	42°	Ahead	4.80	90°
	PS12-NVK	305 (12.0)	4.20	42°	Ahead	4.80	90°
	PS17-NVK	435 (17.0)	4.20	42°	Ahead	4.80	90°
	PS22-NVK	560 (22.0)	4.20	42°	Ahead	4.80	90°

## Pro Hardy

The slightly larger diameter Pro Hardy system provides twice the illumination brightness of the Pro Slim. As such it is particularly suited to inspecting diesel and aero engine cylinders, tanks, pressure vessels, pipes and building wall cavities.

Specification			Standard Probe		With Mirror Tube		
	Model	Probe length mm (Inch)	Outside Diameter (mm)	Field of View	Direction of view	Outside Diameter (mm)	Direction of view
	PH07-NVK	180 (7.0)	6.35	50°	Ahead	8.00	90°
	PH12-NVK	305 (12.0)	6.35	50°	Ahead	8.00	90°
	PH17-NVK	435 (17.0)	6.35	50°	Ahead	8.00	90°
