

# Hommel Pick-up Systems

Surface Finish Probes

The T8000 Measuring Station is available with a wide range of both skidded and skidless pick-ups for use in many different Surface Roughness, Waviness and Contour measurement applications. A selection of the available pick-ups are shown below.

TKZ 100 skidded for gear teeth

TKC 300 Teflon skidded for sensitive materials

TKK 50 skidded for concave and convex surfaces

TKT 100 skidded for recessed surfaces

TKLS 100 skidless for very small shafts

TKLK 100 skidless for very small diameter bores from 1.1mm

TKD 100 skidded for collars and faces

TKO 50 skidded for small diameter bores (2mm)

TKL 100 skidless for R, P and W profiles
